Gerardo Moreno

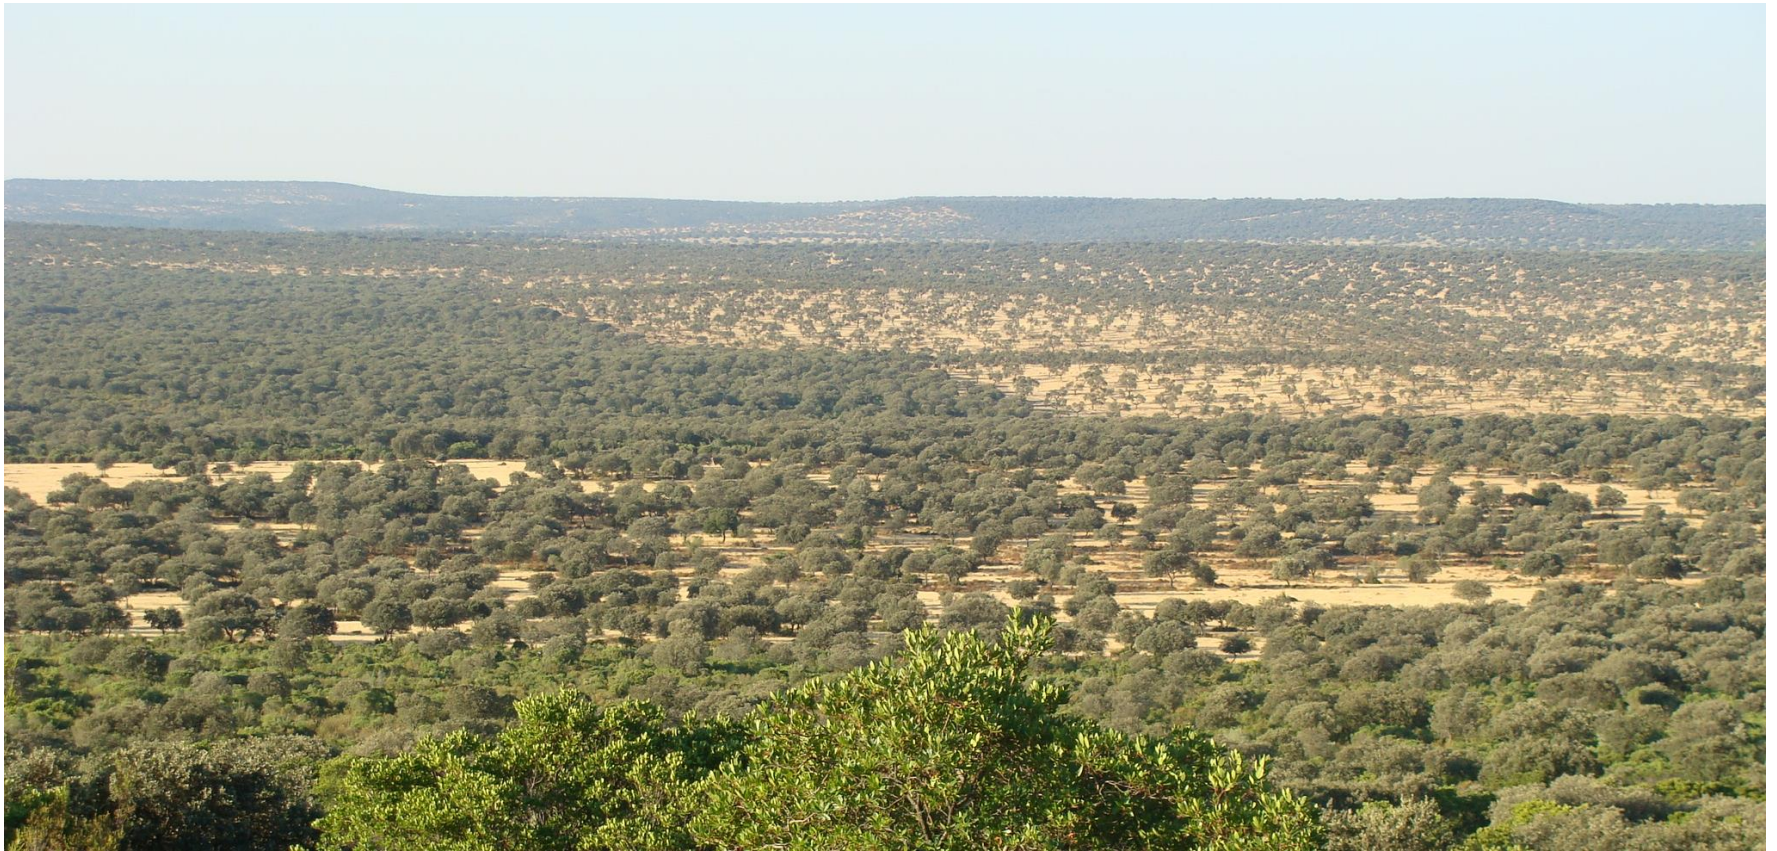

-3,5 Mha Dehesa

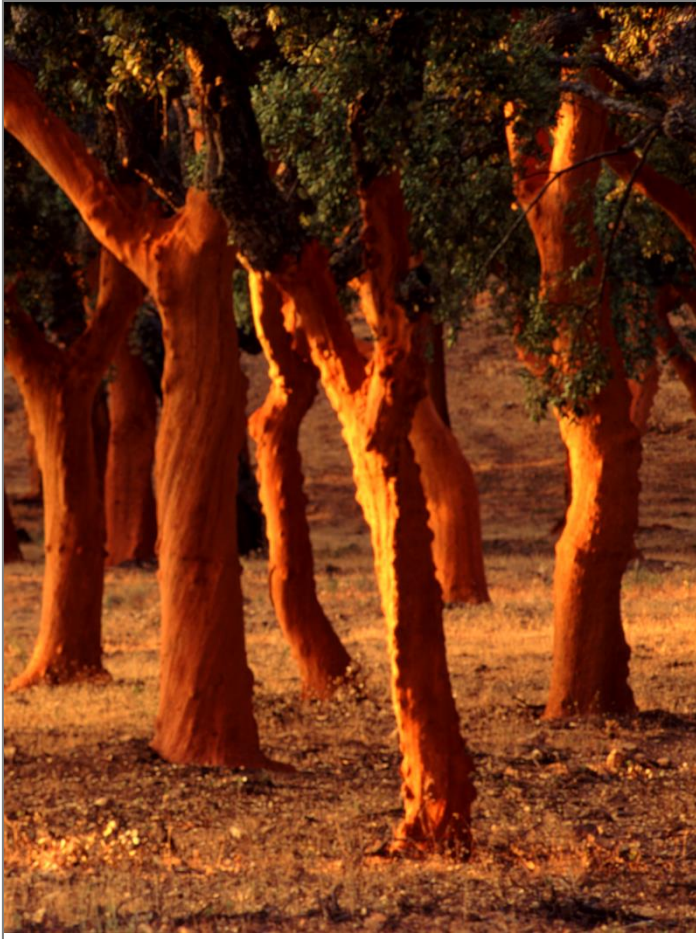

-1 Mha Montado

-Most extensive  
AFS in the UE

# Oak-based extensive agroforestry systems

## Montado

## Dehesa

> 10.000 operations + associated agro-industry

HNV  
farming  
systems

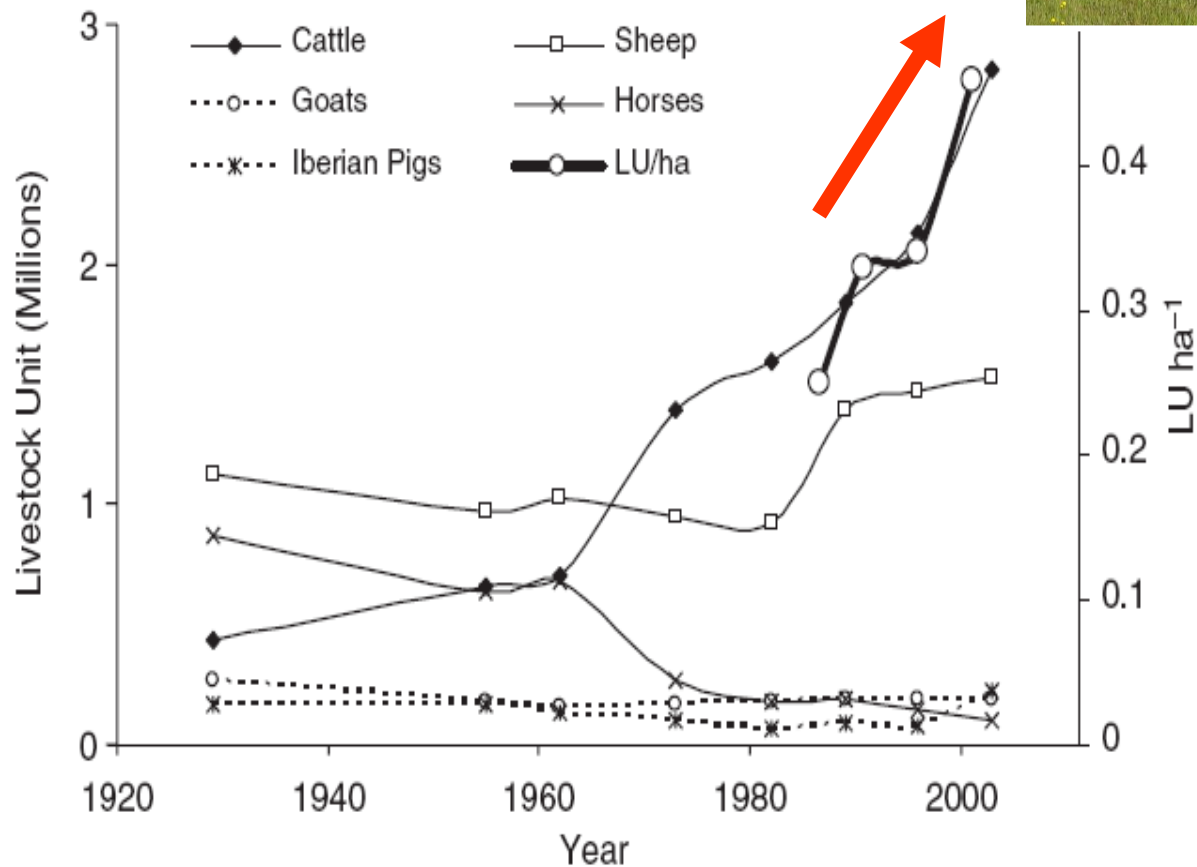

# Landscape and habitat diversity are critical

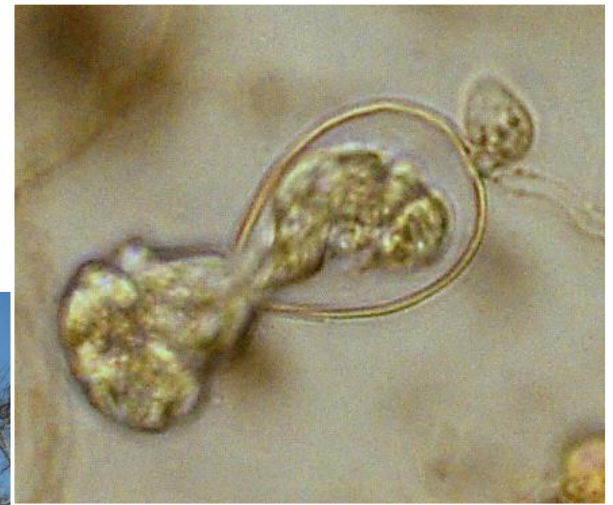

Most species depend on  
secondary habitats

# Stocking rates x3

# Tree ageing and mortality

Sustainable

Profitable

# Steps towards an Iberian strategy

# Achievements: institutes for R&D

# Achievements: cross-border cooperation

# Achievements: PRO-DEHESA

Strengthening the  
private sector

# Ongoing: World Heritage

## But... dependence on CAP payments

In Spain:

Trees not  
eligible

-15-60%

# Challenges:

- Tree layer eligible
- Specific national policy
- Common trade-mark
- Specific certification scheme

Thanks
